Tomatoes – Saladette (Glacier)
Tomatoes – Paste/Can/Freeze (Roma, Rutgers, San Marzano, Amish Paste)

Transplant selection will be dependent on donations. Garden Project is fortunate to receive generous, regular donations throughout June and July. Stop by regularly to see what is in stock!

GP grows a wide variety of culturally-important plants. These plants are available to community members through direct distributions. If you are part of, or connected to, a New American community and would like to learn more, contact GP's New American engagement specialist, Stevie Riley at 517-853-7807 or email at stevie@glfoodbank.org.

All transplants listed are grown in Lansing without the use of harmful fertilizers or GMO seeds. While every effort will be made to supply these exact varieties, due to weather or other unforeseen circumstances, some changes may occur.
